Education

St. Josephs College (Autonomous), Tiruchirappalli — Tiruchirappalli, India
Degree in Master of Computer Applications (MCA) — 2024-01-01 - 2026-01-01
CGPA: 8.32

St. Josephs College (Autonomous), Tiruchirappalli — Tiruchirappalli, India
Degree in Bachelor of Science in Mathematics (B.Sc.) — 2021-01-01 - 2024-01-01
CGPA: 7.8

Sahaya Rani Girls Higher Secondary School, Kalaiyarkovil — Kalaiyarkovil, India
Degree in Higher Secondary (Class XII) — 2020-01-01 - 2021-01-01
Percentage: 80%

St. Josephs Matriculation School, Okkur, Sivaganga — Okkur, Sivaganga, India
Degree in Secondary (Class X) — 2017-01-01 - 2018-01-01
Percentage: 75%

Experience

Orbidx | Software Developer — Coimbatore, India | December 2025 - Present

* Developed and maintained responsive user interfaces using React.js, implementing reusable components, client-side routing, and state management to deliver a seamless user experience.
* Contributed to the development of a scalable Patrolling Management System, collaborating with cross-functional teams to build features for task management, employee tracking, and operational workflows.
* Integrated frontend applications with Node.js and SQL-based backend services through REST APIs, ensuring efficient data handling, performance optimization, and reliable system functionality.

Skills

Programming Languages:	JavaScript, Web technologies, C++, Python
Libraries/Frameworks:	React js, React Native, Django
Tools / Platforms:	Git, GitHub, VS Code
Databases:	PostgreSQL, MongoDB

Projects / Open-Source

Patrolling System | Link — *React js, R-suite components, React-router*

* Designed and developed a role-based Patrolling Management System to streamline task allocation, employee tracking, and operational workflow management across multiple departments and zones.
* Implemented modules for task assignment, shift/unit management, department administration, and real-time status tracking to ensure timely completion of assigned activities.
* Developed analytics dashboards with advanced filtering by unit, department, and time period, enabling data-driven monitoring of workforce productivity and operational performance.

Church Management | Link — *React js, Node js (express js), Mongo DB*

* Developed a responsive church management web application as part of a 2-member team using Next.js, integrating REST APIs for user authentication, priest authentication, and role-based access control.
* Designed and implemented interactive frontend modules for priest availability tracking, user registration/login, and baptism request management with protected routes, dashboard navigation, and real-time status updates.
* Built reusable UI components, route-based layouts, authentication contexts, and API service layers, enabling seamless communication between the frontend and Node.js/MongoDB backend.
* Implemented end-to-end workflows allowing users to submit and track church service requests, while enabling priests to review, approve, reject, and manage requests through a dedicated dashboard interface.
* Deployed backend in railway and deployed frontend in vercel.

Patient Record Management System | Link *Python, Django, MongoDB, HTML, CSS, JavaScript*

* Developed a Hospital Management System using Python and Django, streamlining patient record management and administrative workflows.
* Implemented MongoDB-based data storage solutions for efficient patient data creation, retrieval, and updates.
* Created a responsive frontend with HTML, CSS, and JavaScript, enhancing usability and accessibility across multiple devices.

Chicken Shop Data Analytics | Link *Python, Pandas, Seaborn*

* Developed a Chicken Shop Sales Analytics Dashboard using Python, Pandas, NumPy, and Matplotlib, analyzing sales transactions to generate actionable business insights.
* Performed data analysis to identify top-selling products, peak sales hours, daily/monthly revenue trends, profit margins, customer purchasing patterns, and inventory performance, enabling data-driven decision making.
* Built interactive visualizations and automated reports to track sales, profit, revenue distribution, and business KPIs, reducing manual analysis time and improving reporting efficiency.

Certifications

- MOOC course in DBMS
- Data Analytics using python
